

Course Code	21CSS101J	Course Name	PROGRAMMING FOR PROBLEM SOLVING	Course Category	S	Engineering Sciences	L	T	P	C
							3	0	2	4

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR): *The purpose of learning this course is to:*

Learning

Program Learning Outcomes (PLO)

CLR-1 :	Think and evolve with a logic to construct an algorithm and pseudocode that can be converted into a program	1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
CLR-2 :	Utilize the appropriate operators and control statements to solve engineering problems	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLR-3 :	Store and retrieve data in a single and multidimensional array				L	H	H	H	H	-	-	M	M	L	-	H	-	-	-
CLR-4 :	Create custom designed functions to perform repetitive tasks in any application				L	H	H	H	H	-	-	M	M	L	-	H	-	-	-
CLR-5 :	Create basic Abstract Data Types with python				L	H	H	H	H	-	-	M	M	L	-	H	-	-	-
CLR-6 :	Create applications using suitable python library functions for solving datascience problems.				L	H	H	H	H	-	-	M	M	L	-	H	-	-	-
Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:																		
CLO-1 :	To solve problems through computer programming. Express the basic data types and variables in C	2	85	80															
CLO-2 :	To use appropriate data types in simple data processing applications. To create programs using the concept of arrays.	3	85	80															
CLO-3 :	To create string processing applications with single and multi-dimensional arrays.	3	85	80															
CLO-4 :	To create user defined functions with required operations. To implement pointers in applications with dynamic memory requirements.	3	85	80															
CLO-5 :	To create programs using the python data types, loops, control statements for problem solving	3	85	80															
CLO-6 :	To implement the suitable python library based solutions for solving statistical problems in data science	3	85	80															

Unit-1 Evolution of Programming & Languages - Problem solving through programming - Writing algorithms & Pseudo code - Single line and multiline comments - Introduction to C: Structure of the C program - Input and output statements. Variables and identifiers, Constants, Keywords - Values, Names, Scope, Binding, Storage Classes - Numeric Data types: integer, floating point
Non-Numeric Data types: char and string - L value and R value in expression, Increment and decrement operator - Comma, Arrow and Assignment operator, Bitwise and Size-of operator - Arithmetic, Relational and logical Operators - Condition Operators, Operator Precedence - Expressions with pre / post increment operator
Unit-2 Conditional Control -Statements :Simple if, if...else - Conditional Statements : else if and nested if - Conditional Statements : Switch case - Un-conditional Control Statements : break, continue, goto - Looping Control Statements:for, while, do..while - Looping Control Statements: nested for, nested while - Introduction

to Arrays -One Dimensional (1D) Array Declaration and initialization - Accessing, Indexing and operations with 1D Arrays - Array Programs – 1D - Initializing and Accessing 2D Array, Array Programs – 2D - Pointer and address-of operators -Pointer Declaration and dereferencing, Void Pointers, Null pointers Pointer based Array manipulation
Unit-3 String Basics - String Declaration and Initialization - String Functions: gets(), puts(), getchar(),putchar(), printf() - Built-inString Functions: atoi, strlen, strcat, strcmp -String Functions: sprintf, sscanf, strrev, strcpy, strstr, strtok - Operations on Strings - Function prototype declaration, function definition - Actual and formal parameters - Function with and without Arguments - Function with and without return values - Call by Value, Call by Reference - Passing Array to Function - Passing Array elements to Function - Function Pointers
Unit-4 Python: Introduction to Python - Introduction to Google Colab - Basic Data Types: Integers, Floating Points, Boolean types - Working with String functions - Working with Input, Output functions - Python-Single and Multi line Comments/ Error Handling - Conditional & Looping Statements: If, for, while statements - Working with List structures - Working with Tuples data structures - Working with Sets - Working with Dictionaries - Introduction to Python Libraries - Introduction to Numpy - High Dimensional Arrays
Unit-5 Creating NumPy Array -Numpy Indexing - Numpy Array attributes - Slicing using Numpy - Descriptive Statistics in Numpy: Percentile - Variance in Numpy - Introduction to Pandas - Creating Series Objects, Data Frame Objects - Simple Operations with Data frames - Querying from Data Frames -Applying Functions to Data frames - Comparison between Numpy and Pandas - Speed Testing between Numpy and Pandas - Other Python Libraries
Lab Lab 1: Input, Output Statements, Variables Lab 2: Data types & Operators-I Lab 3: Data types & Operators-II Lab 4: Control Statements (Branching, Looping) Lab 5: Arrays Lab 6: Arrays with Pointers Lab 7: Strings Lab 8: Functions Lab 9 : Arrays and Functions Lab 10: Input, Output in Python Lab 11: Python data structures Lab 12: Arrays in Python Lab 13: Operations with Numpy Lab 14: Operations with Pandas Lab 15: case study: Data science with Numpy, Pandas

Learning Resources	Reference Books (C):	Reference Books (Python):
	1. Programming in C, E.Balagurusamy, Mc Graw Hill, Eighth Edition. 2019. [chapters 1 to 6 & 8 To 11] 2. Head First C: A Brain-Friendly Guide, By David Griffiths, Dawn Griffiths, Oreilly. [Chapters 2 to 4] 3. Let Us C, Fifth Edition, Yashavant P. Kanetkar, BPB publications. [Chapters 1 to 6, 8 to 9] 4. Problem Solving & Programming Concepts, Maureen Sprankle, Jim Hubbard, Prentice Hall, Ninth Edition.
